Shopify
Shopify API

To see these integrations in action we recommend you try the live demonstration: movedata.io/demo

Implementing MoveData is simple and easy

Projects follow a linear path and generally take less than a month to deliver

- | | |
|---------------------|--|
| Investigate: | Review your existing implementation |
| Prototype: | Rapidly develop a “first cut” |
| Iterate: | Work through the integration (Dev → Test → Repeat) |
| UAT: | Client conducts final acceptance testing |
| Go-Live: | Enable in your production Salesforce instance |
| Warranty: | Fixes for bugs and small logic changes |

Affordable plans to suit your Non-Profit

Projects are typically delivered for \$12,000 + GST (± \$6,000).

Once your Non-Profit is integrated with MoveData, a \$249 (single platform) or \$499 (unlimited platforms) monthly subscription applies.

Your subscription provides:

- Access to MoveData Salesforce App and native workflow support to manage integrations and notifications
- Amazon Web Services hosting to support delivery of unlimited real-time notifications into your Salesforce instance
- Maintenance of all supported platforms to ensure compatibility when platforms change or update their APIs
- Access to new fundraising platforms which are released quarterly and just work with your MoveData integration

Technical support can be provided to fulfil your organisation’s requirements on a once-off or ongoing basis.

Powerful Salesforce Integration for Non-Profits

"We depend on MoveData to deliver tens of thousands of real-time donations and registrations into Salesforce – so we can successfully run the World's Greatest Shave and our other major campaigns."

- Glen Shields, Head of Data & Analytics, Leukaemia Foundation
